DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuan et al. (6,069,417)

Regarding claim 1, Yuan et al. shows a positioning apparatus comprising:

- A movable member for transmitting driving force in a driving-axis direction to a stage (Figures 4 and 5);
- A first electromagnet (42) for driving said movable member in the driving-axis direction by forming a magnetic path between said movable member and said first electromagnet and generating first magnetic flux (F1); and
- A second electromagnet (52) which is positioned away from said first electromagnet and arranged in an overlapping direction, for driving said movable member in the driving-axis direction by forming a magnetic path between said movable member and said second electromagnet and generating second magnetic flux (F2) having an inverted polarity from the first magnetic flux.

Art Unit: 2834

Regarding claims 2-4 and 9-11, it is noted that Yuan et al. also shows all of the limitations of the claimed invention.

With regard to claim 12, the method would be inherent and obvious since the prior art references meet the structural limitations of the claimed device.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuan in view of Nihei et al. (4,945,268).

Regarding claims 5 and 7, Yuan et al. shows all of the limitations of the claimed invention except for the third electromagnet.

Nihei et al. shows the third electromagnet (Figure 7) for the purpose of increasing force.

Since Yuan et al. and Nihei et al. are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include the third electromagnet as taught by Nihei et al. for the purpose discussed above.

Art Unit: 2834

Regarding claims 6 and 8, it would have been obvious to one having ordinary skill in the art at the time the invention was made to apply currents at a ratio 1:2:1, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Information on How to Contact USPTO

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dang D Le whose telephone number is (571) 272-2027. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
